EDUCATION

Institute of Computing Technology, Chinese Academy of Sciences	Sept. 2025-Now
PhD in Computer Architecture	GPA: 3.97/4.00
Advisor: Prof. Yungang Bao	
University of Chinese Academy of Sciences	Sept. 2021-July 2025
Bachelor of Computer Science and Technology	GPA: 3.89/4.00
Advisor: Prof. Yungang Bao	
University of California, Berkeley	Jan. 2024-May 2024
Visiting Student in EECS Department	GPA: 4.00/4.00
CS152 (Computer Architecture), CS170 (Algorithms), CS188 (Artificial Intelligence)	

ACADEMIC EXPERIENCE

FPGA Verification Platform Engineering Intern	July 2023-Aug. 2023
Institute of Computing Technology, Chinese Academy of Sciences	
- Developed an HLS-based LeNet DUT on ZYNQ Sidewinder FPGA for an HLS verification platform — synthesized IP via Vitis, deployed Linux, and programmed the configurable fabric - Trained LeNet parameters in Python and loaded onto FPGA via custom memory-mapping program	
LLM DSA Intern	Sept. 2024-Now
Beijing Institute of Open Source Chip	
- Focused on Large Language Model Domain-Specific Architecture - Developed Mosaic, a microarchitectural characterization framework for LLM inference on AICPUs, using workload selection, GBDT modeling, and TreeSHAP attribution to identify phase-specific performance factors	

PROJECTS

Mosaic: Microarchitectural Characterization of LLM Inference on AICPUs
Institute of Computing Technology, Chinese Academy of Sciences
- Constructed Mosaic-Dataset from 107 models, 1,108 tasks, and 340 microarchitectural events, selecting representative workloads with K-medoids - Built phase-specific GBDT and TreeSHAP models to identify key events and guide runtime configuration, achieving 1.23x end-to-end speedup over the llama.cpp default configuration while reducing exploration cost by 320x
HG-KDA: Hardware-Grounded Kernel Design Agent (WIP)
Institute of Computing Technology, Chinese Academy of Sciences
Designed a cross-platform kernel optimization framework combining static hardware knowledge, dynamic profiling, evidence fusion, bottleneck diagnosis, and structured kernel action plans

HONORS & AWARDS

Outstanding Graduate of Beijing (Top 1%)
Pacemaker to Merit Student (Top 1%)
First Class Academic Scholarship (Top 5%)
Merit Student
Outstanding Student Leader

SKILLS

TOEFL: 113 (R29, L30, S25, W29)	Aug. 2023
Programming: C/C++, Verilog, Chisel, Python (Some experience with: Golang, HTML, CSS)
